

Pig Handling System (Including Jib Crane and Trolley)

Product Description

Rhino Process Equipment™ provides custom made pig handling cranes and trolley systems for your pigging station. These systems can help you to handle, load, and unload the pigs without using man power and minimize the work accidents. Each pig handling and trolley system is designed and manufactured to meet the requirements of each client. Pig handling systems consist of a trolley and a crane. Pig trolleys can be either mechanical (man-power), or automatic, which is powered by a motor. Systems can be also applied separately. Spark proof certificated handling system can be also supplied on request. Handling system specially designed for easy use, and easy to maintenance; no need for spare parts.

Product Benefits

- Easy to use and install.
- You do not need a special tool or experience to install the pig handling system.
- Rhino™ pig handling system is made of corrosion resistant materials with long life duration. Rhino™ offers spare parts for all of its products during maintenance.
- Suitable for intelligent pigging.

Key Features

- Rhino™ pig handling system comes with the sand blasted and primer coated and color of your choice.
- All welds are 100% inspected and tested
